YOUR RELIABLE PARTNER

Your reliable partner for technical adhesive tapes, surface protection films and converting.

The FFT Group is a medium-sized company based in Germany with subsidiaries in Austria and Denmark. With around 100 employees, FFT has been your reliable partner in the fields of technical adhesive tapes, surface protection films and converting for 30 years.

Our customers from the automotive, building & construction, metal service centre, white goods and retail sectors benefit from our in-depth knowledge and experience in advising on and selecting and applying the relevant products.

With our extensive processing capacities and warehouses at four locations, we can react quickly and flexibly to your individual requirements. As an authorised distributor of well-known manufacturers such as 3M, Lohmann, Novacel, Nitto, Pregis, Scapa and tesa, we guarantee the highest product quality.

We are an authorised contact for:

STRONG BONDS

Technical adhesive tapes can be used in a wide variety of ways and can be found in all industrial applications. The finest nuances determine which material best fulfils your requirements.

With us, you will not only find the right adhesive tape, but also the ideal packaging to make your process safer, more efficient and more economical in the long term. Thanks to our wide range of products, we offer customised solutions for your specific requirements.

We stock adhesive tapes from a wide range of manufacturers:

Connecting
and assembling

Covering
and protecting

Conducting, insulating
& much more

SECURELY PROTECTED SURFACES

Self-adhesive surface protection films protect your surface during processing, storage and transport - without leaving any residue when removed!

The quality of the films to be used is determined by the structure of the surface to be protected, possible stresses on downstream processes and other influencing factors.

**Challenge us -
we will find
the optimum
protective
film for your
processes.**

**We support
you in your
selection for:**

- Metals
- Plastics
- Painted surfaces & much more

CUSTOMISED SOLUTIONS

**Benefit from
our in-depth
knowledge and
experience.**

In our company, we focus on converting - the customised processing and adaptation of self-adhesive materials according to your requirements.

As an individually designed moulded part, a customised cut from adhesive tape or protective film can not only be used for simple joining, fastening or covering, but can also optimise your entire process.

We provide you with manufacturer-independent advice and work with you to develop the perfect solution for your application!

SUITABLE SOLUTIONS IN ALL AREAS

Our versatility knows no bounds. Whether customised one-off production, the finest small series or industrial series production: thanks to our many years of experience in a wide range of industries, we specialise in finding the perfect solution for your individual application. Together we will master your challenge and get you to your goal.

**We offer
customised
solutions
in all areas.**

Transportation

Construction industry

Plastic injection moulding

Printing & paper

Furniture industry

Metal processing

LATEST TECHNOLOGIES - DIVERSE POSSIBILITIES

Thanks to our modern systems, we are able to offer you more than just standard formats. We manufacture customised widths and running lengths as well as die-cut parts exactly according to your specifications so that they optimise your processes perfectly.

PUNCHING
LASERING
CUTTING
SAWING
LAMINATING
WINDING

OUR ENVIRONMENT - OUR RESPONSIBILITY

**Innovative
and more
sustainable
product
alternatives.**

We see sustainable business practices not only as a responsibility towards our environment, but also as an ethical obligation towards our customers, employees and society in general. The first innovative and more sustainable product alternatives are already being used successfully. Development is in full swing and further product innovations will follow continuously. As your experts for adhesive tapes, protective films and their further processing, we support you in finding environmentally friendly alternatives for your application and thus achieving your own environmental goals.

FFT GROUP
SUSTAINABILITY & ENVIRONMENT

FOCUS ON QUALITY

Our primary goal is to always offer you the best solution of the highest quality. The basis for this is our ISO 9001 and ISO 14001 certified quality and environmental policy. Defined processes help our project team to ask the right questions right from the start so that we can recognise, understand and implement your requirements. We recognise the diverse needs of different industry sectors and understand the high quality standards required by IATF 16949 for the automotive industry. Continuous improvements through investment in the latest machinery, the training and further education of our employees and the latest measurement technology are a matter of course for us.

Your requirements are our aspiration.

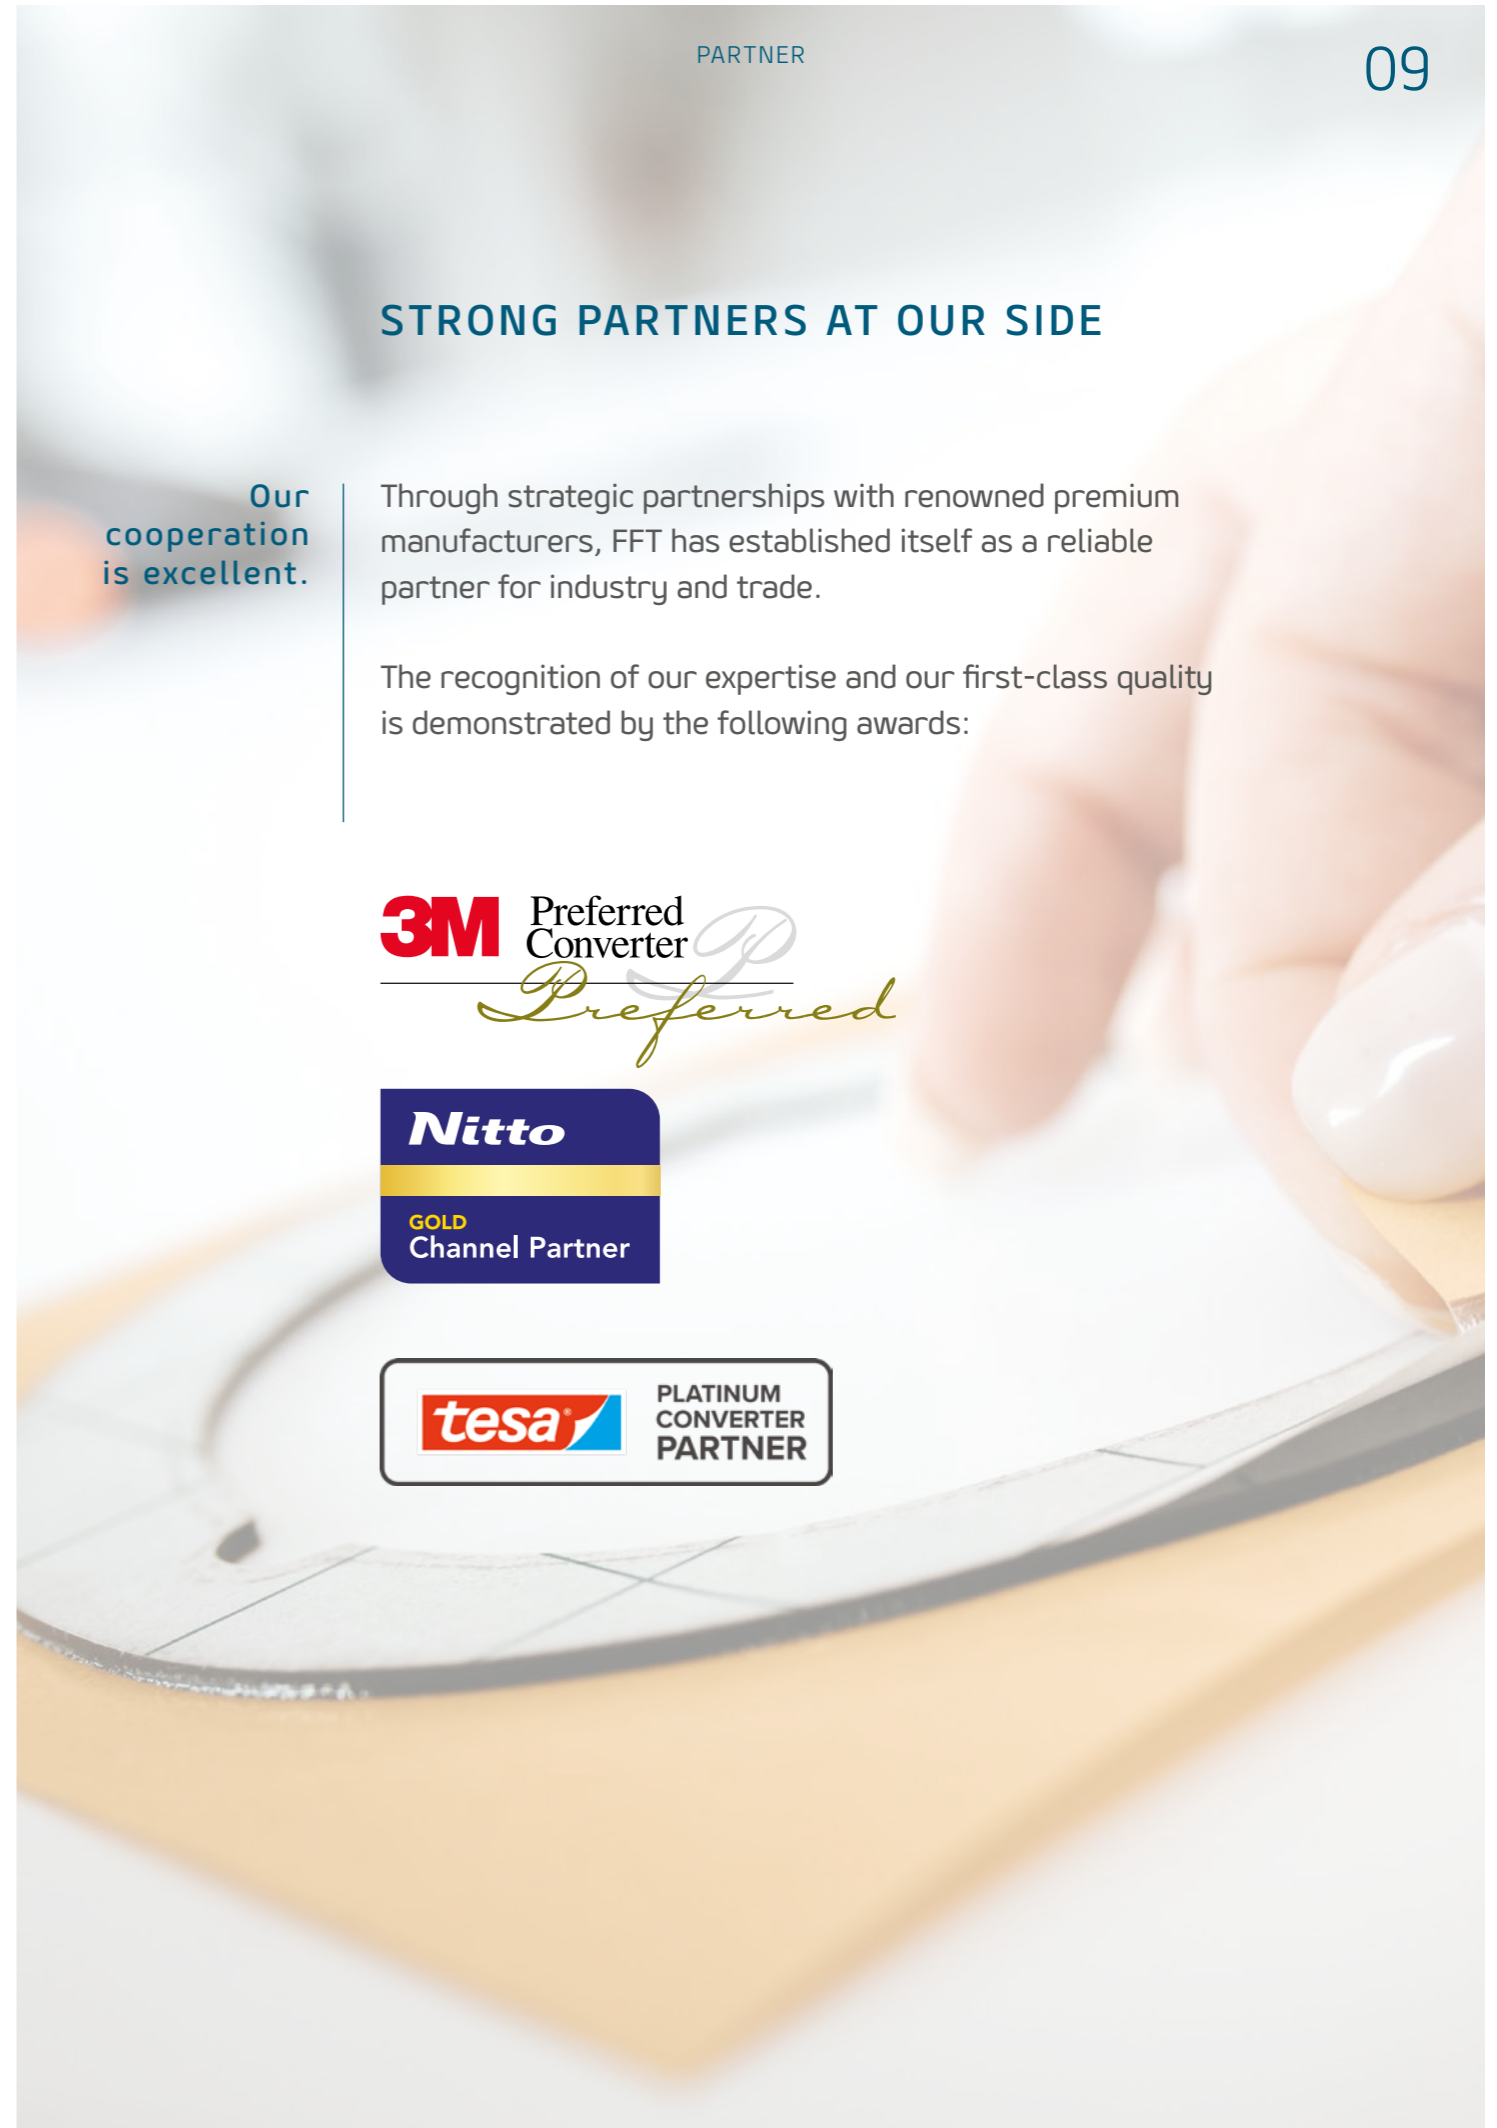

STRONG PARTNERS AT OUR SIDE

Our cooperation is excellent.

Through strategic partnerships with renowned premium manufacturers, FFT has established itself as a reliable partner for industry and trade.

The recognition of our expertise and our first-class quality is demonstrated by the following awards:
